PROFILE

Mobile application security tester with hands-on practice testing Android and iOS apps, covering static and dynamic analysis, IPC security testing, and structured vulnerability reporting. Works with Frida, Objection, MobSF, Burp Suite, and ADB. Currently a Jr. Mobile Application Security Analyst intern at Byte Capsule.

EXPERIENCE

Jr. Mobile Application Security Analyst (Intern)

Byte Capsule

-- Oct 2026 – Present

- Assist senior analysts with Android and iOS application security assessments under mentor supervision.
- Perform static and dynamic analysis using Frida, Objection, MobSF, Burp Suite, ADB, jadx, and apktool.
- Document findings with CVSS severity ratings and OWASP MASVS/MASTG references.

PROJECTS

Android Vulnerability Assessment

Byte Capsule training lab

-- Sep 2026

- Assessed AndroGoat and InsecureShop, two intentionally vulnerable Android apps, across IPC, data storage, network, and authentication security.
- Tested exported components and inter-process communication using ADB and Frida.

EDUCATION

BA (Honours) — English

National University (NU) · 2024 – Present

HSC (Alim) — Humanities

Madrasah Board · 2024 · GPA 5.00 (A+)
